

# VOTEIN

By Deeptansh Verma

# PROBLEM

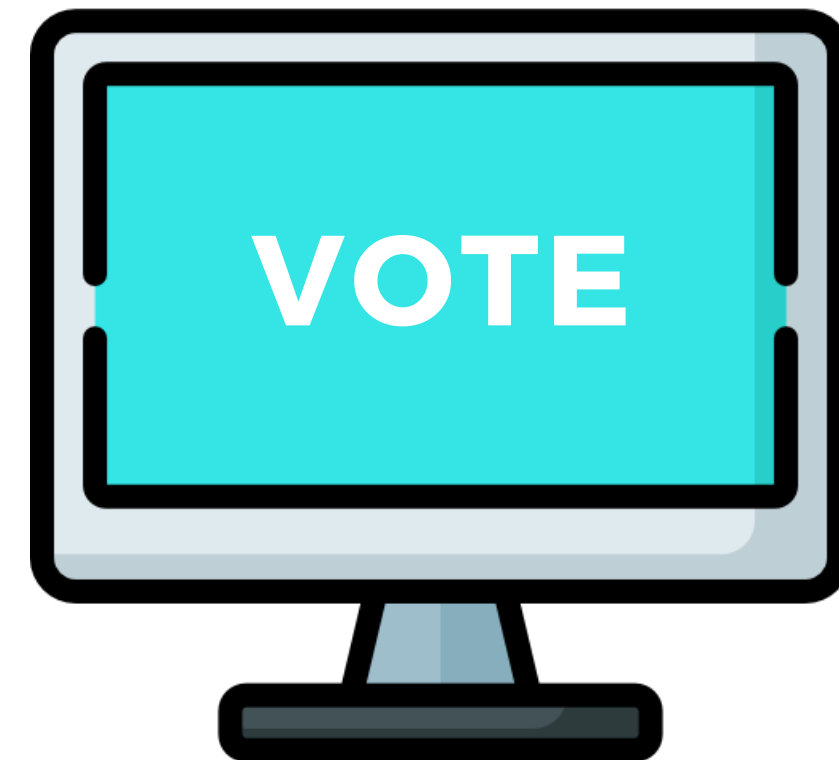

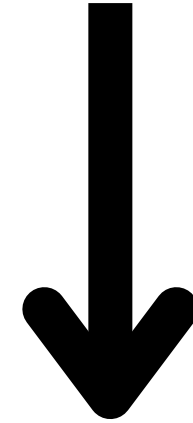

Voting is the process of expressing one's choice or opinion on a particular matter, typically in the context of electing representatives or making decisions on specific issues. It is a fundamental aspect of democratic societies and plays a crucial role in determining the course of governance and decision-making.

**OBJECTIVE**

# THE PROCESS

## 1 CREATING THE WEBPAGE

Creating the elements of the web page and styling and positioning them to create an eye-catching website.

## 2 DATABASE FOR WEBPAGE

creating the database to store the data of users and participants.

## 3 AZURE FUNCTIONS

Connecting the frontend of web page with the database using azure functions to create a serverless architecture
